 The Board of Directors of the company for the transfer of Preferred Stock, Series B, will be closed at 3 o'clock P. M. Feb. 17, 1911, and will report to the stockholders of record at the close of business on Feb. 17, 1911.  
 W. E. MERRISS, Secretary.

**FACTORY FIRE LOSS OF \$3,000.**  
 Hurant Wouldn't Work and Fire Apparatus on Another Alarm.  
 A two-story brick factory building in the rear of 127-33 Washington avenue, The Bronx, was gutted by fire yesterday afternoon, causing a damage of \$3,000. The building was owned by John Kientzsch, who manufactured buttons on the second floor. A street hydrant nearest the building wouldn't work and the fire apparatus failed to answer the second alarm. The delay resulted in the large loss.  
 A thermometer on the floor of the building was heated up to 150 degrees Fahrenheit, but did not break.  
 Two large tenements in front of the building were filled with smoke and there was a scramble for safety among the tenants. No one was hurt.

**FINANCIAL AND COMMERCIAL.**

Continued from Seventh Page.

**SUSPICIOUS FIRES IN BUTTE**  
 for the half-year show receipts of \$13,450,000, an increase of \$1,000,000 over the corresponding period of last year. The Federal Fly Copper Company is the largest producer of copper in the district, and its output is being rapidly increased. The Fly Consolidated Copper Company has drifted for twenty-one feet in a westerly direction, the formation being a general Fly monzonite, carrying copper values at the top and bottom. The superintendent believes he will hit a great body of ore. Announcement is made by the Tonopah Mining Company that a 15-cent extra dividend will be paid to the regular 25-cent quarterly dividend. The company has 120 acres under systematic exploration, and it is reported that the mine ore run 28 1/2 tons average.

The Central section of the Nevada Copper Belt Railroad from Mason Valley to Hudson has been completed. This section of the line will be in operation by the end of the month, and will into the Smith Valley. The line now proceeds southward to the Nevada Copper Belt, which was stopped by water. The Continental Pinches has completed three-quarters of the work on the main line station at the 200 foot level. When the pinches is in place, the sinking of the shaft, which was stopped by water, will be resumed.

The Desert Mountain Copper Company, operating in the Douglas, Nevada, district, proposes to drive a tunnel 750 feet in length to reach a great fissure which crosses the property. The company owns twenty acres of land, and claims and has opened the main vein three miles along its strike.

**COLORADO SPRINGS, Feb. 15.**—The January Cripple Creek production shows an increase of 200 tons over the December output, and a gross value of \$1,200,000, or \$18 1/2 cents per ton, represents an increase of 100 tons in the output of the mine. A feature in the tonnage treated by the concentrator is the large amount of low-grade material, which is being treated, worth each \$3.00. The Straton's Independence, 7,000 tons, worth each \$3.25, and the total, 84,887, or 10,000 tons, shows a growing proportion of low-grade material and a decline in the average of the general product, including smelter and mill grades.

The Elkhart Gold Mining Company has purchased the property of the Little Mary mine, consisting of the Little Mary, Ida May and Mountain Girl claims, comprising 100 acres of land, and is now operating on the Mountain Girl claim. The company is shipping the ore from the Mountain Girl claim to the Elkhart smelter at El Paso. The company returns an average of \$2.40 a ton. The company has a large amount of ore on hand.

The Fortuna Mining Company is shipping the ore from the Fortuna mine to the Elkhart smelter at El Paso. The company returns an average of \$2.40 a ton. The company has a large amount of ore on hand.

The Portland Gold Mining Company, representing other companies, has demanded inspection of the book of assays of the high-grade ore, for the purpose of ascertaining the value of the Isabella Mine property, which is the ore of the Empire shaft. It is an ore body carrying as high as 100 points of gold, and is being treated by the surface at the junction of a vein thirty-two inches wide and a vein thirty-two inches wide and a vein thirty-two inches wide, the lowest of which is 800 a ton. George Sharkey is lessee of the mine, and is now operating on the mine. The mine is being operated by the Portland Gold Mining Company. The mine is being operated by the Portland Gold Mining Company.
